.....This Thesis is dedicated to my
parents, my brother and sister,
with the blessings of whom I
have been able to rise to this
level.....

C E R T I F I C A T E

This is to certify that the Thesis entitled "Ferro- and Pyroelectric studies on doped and undoped TGS Crystals" being submitted by Mr A K Batra to the Indian Institute of Technology, Delhi, for the award of the Degree of Doctor of Philosophy in Physics is a record of bonafide research work carried out by him. Mr Batra has worked under my guidance and supervision and has fulfilled the requirements for the submission of this Thesis

The results obtained in this Thesis have not been submitted, in in part or full, to any other University or Institution for the award of any degree or diploma.

(S.C. Mathur)

Thesis Supervisor
Professor of Physics
Indian Institute of
Technology, Delhi

A C K N O W L E D G E M E N T S

I am highly indebted to Prof. S.C. Mathur for his inspiring guidance and encouragement during the entire course of this work. His valuable criticisms and suggestions on the manuscript have been of immense help to me. I am grateful to Dr. A. Mansingh, Reader, Department of Physics and Astro Physics, Delhi University, for stimulating discussions and for providing facilities to carry out some of the measurements. His constant interest in the work was a source of encouragement to me.

It is a pleasure to acknowledge the co-operation received from all the members of the faculty and members of non-teaching staff of Physics Department. My sincere thanks are due to my colleagues and friends, Dr. Ramadhar Singh, Miss Keya Roy, Messrs J.P.S. Chauhan, S. Ravindra Nath, A.D. Sharma, Rakesh Kumar, A.K. Vaseashta, K.H. Rao, B. Ratra, N.K. Gaur and Dr. S. Mitra for their active support and kind co-operation. Specific mention should be made to Mr. S.B. Krupanidhi and Dr. A.K. Seth, who helped me generously at various stages of the work.

I wish to express my deep sense of gratitude towards the members of my family for their unending tolerance and moral support during the long course of investigation.

Finally, I would like to express my hearty thanks to my friend, Mr. R.K. Chatrath for his readily available help and neat typing of the manuscript.

Ashok K. Batra

CHAPTER - I - INTRODUCTION AND GENERAL SYNOPSIS	1
1.1 - Introduction	1
1.2 - Objective of the Thesis	5
1.3 - Outline of the Thesis	6
1.4 - Conclusions	9
CHAPTER - II - THE PRESENT STATUS OF WORK ON TGS SINGLE CRYSTALS	11
2.1 - Introduction	11
2.2 - Crystal Structure	11
2.3 - Nature of Transition	12
2.4 - Ferroelectric and Electrical Properties	14
2.4.1 - Dielectric Constant	14
2.4.2 - Spontaneous Polarisation and Coercive Field	15
2.4.3 - Electrical Conductivity	15
2.4.4 - Pyroelectric Properties	16
2.5 - Specific Heat, Thermal Conductivity and Electrocaloric Effect	16
2.6 - Piezoelectric and Elastic Properties	18
2.7 - Optical and Related Properties	20
2.8 - Spectroscopic Properties	21
2.9 - Domains, Imperfections and Polarization Reversal	23
2.9.1 - Effect of Impurities	24
2.9.2 - Effect of Radiation	26
2.9.3 - Surfaces	26
2.10 - Applications	27
- References	30

CHAPTER III - THEORY	45
3.1 - Pyroelectricity	45
3.1.1 - Phenomenological and Structure Model of the Pyroelectric Effect	45
3.1.2 - Types of Pyroelectric Effect	49
3.2 - Theories of Ferroelectricity	51
3.2.1 - Thermodynamic Theory	51
3.2.2 - Lattice Dynamic Theory	52
3.2.3 - Statistical-Dipolar Theory	53
- References	59
CHAPTER IV - EXPERIMENTAL TECHNIQUES	60
4.1 - Introduction	60
4.2 - Growth of Single Crystals	60
4.2.1 - Crystallization Apparatus	61
4.2.2 - Procedure for Preparation of TGS Single Crystals	63
4.2.3 - Comments on the Quality of the Crystal Grown	65
4.2.4 - Sample Preparation for Electrical Measurements	65
4.3 - Measurement Techniques	65
4.3.1 - Measurement of Dielectric Constant	65
4.3.2 - Sample Holder for Dielectric Measurements	69
4.3.3 - Operating Procedure	70
4.4 - Measurement of Spontaneous Polarization and Coercive Field	71
4.4.1 - Sample Holder for Hysteresis Loop Measurements	73
4.5 - Measurement of D.C. Conductivity	73
4.6 - Measurement of Pyroelectric Current	74
4.6.1 - Sample Holder for Pyroelectric Measurements	76
- References	77

CHAPTER - V	- FERROELECTRIC AND ELECTRICAL PROPERTIES OF TGS CRYSTALS	78
5.1	- Introduction	78
5.2	- The Characteristics and Mean-Field Parameters for Pure TGS Crystal	78
5.3	- Dielectric Constant	82
5.3.1	- Dielectric Constant of TGS Crystal Doped with Inorganic Dopants	83
5.3.2	- Dielectric Constant of TGS Crystal Doped with Aminoacids	87
5.3.3	- Dielectric Constant of TGS Crystal Doped with Organic Dopants	91
5.4	- Spontaneous Polarization and Coercive Field	94
5.4.1	- Spontaneous Polarization and Coercive Field of TGS Crystals Doped with Inorganic Dopants	94
5.4.2	- Spontaneous Polarization and Coercive Field of TGS Crystals Doped with Aminoacids	96
5.4.3	- Spontaneous Polarization and Coercive Field of TGS Crystals Doped with Organic Dopants	103
