

ELECTRICAL CONDUCTIVITY OF SEEDED HYDROCARBON
COMBUSTION PRODUCTS FOR OPEN-CYCLE MHD GENERATOR

By

SYED QAIM HUSSAIN

Thesis submitted to the Indian Institute of Technology, Delhi
for the award of the Degree of
DOCTOR OF PHILOSOPHY

Department of Physics
Indian Institute of Technology, Delhi

October, 1978

ACKNOWLEDGEMENT

I wish to express my deep sense of gratitude to Dr. B.K.Sawhney for his enthusiastic guidance, kind encouragement and inspiration throughout the course of this work.

No word would suffice to express my deep regards for Professor M.S.Sodha without whose expert assistance this work would not have been possible. I am much indebted to Dr. A.Chandra who catalysed the work. I take this opportunity to thank Professor A.K.Ghatak for keen interest in my work, and to Dr. R.P.Sharma, Dr. S.C.Kaushik and Dr. R.P.Dahiya for guidance at several stages of the work.

It is also a pleasure to acknowledge my stimulating association with Mr. Bhumesh K.Gupta, Mr. T.K.Naidu, Mr. B.D.Gupta, Mr. Govind and other colleagues in MHD and Electrophysics Laboratory.

I especially want to acknowledge the painstaking assistance of Mr. W.H.Rizvi during the course of this work. Thanks are due to Mr. T.N.Gupta for helping in different ways and Mr. S.D.Malik for efficient typing of the thesis.

I am also thankful to my parents and other relatives who provided the necessary moral support to complete the job.

Syed Qaim Hussain

CONTENTS

	<u>Page No.</u>
<u>CHAPTER_1</u>	
INTRODUCTION :	1
Summary of the Thesis :	7
Relevant Publications :	12
References :	13
<u>CHAPTER_2</u>	
MATHEMATICAL ANALYSIS :	15
A. Calculation of Composition of seeded combustion products :	15
B. Electron density and electrical conductivity :	29
1. Electron density :	31
2. Electron mobility :	36
3. Modified analysis :	39
References :	42
<u>CHAPTER_3</u>	
EXPERIMENTAL MEASUREMENTS :	44
Experimental Set-up :	44
(i) Burner and flow unit :	44
(ii) Diagnostic Set-up :	45
(a) Flame temperature :	45
1. Thermocouple :	46
2. Optical pyrometer :	46

(b) Seeding	:	48
(c) Measurement of electrical conductivity	:	50
Estimation of error:	:	53
Effect of gas flow on probe characteristics	:	54
References	:	56

CHAPTER_4

RESULTS AND DISCUSSION	:	57
(1) Oxy-Acetylene System	:	58
(2) Air-Acetylene System	:	62
(3) Oxy-Liquified Petroleum-Gas System	:	66
(4) Simulated Oxy-Water Gas System	:	71
(5) Hydrocarbons with varying C/H	:	77
(6) Conclusion	:	85
References	:	86

CHAPTER_5

METHANE AND COAL-FIRED SYSTEMS	:	87
References	:	95

APPENDIX-A

COMPUTER PROGRAMME FOR CALCULATION OF COMPOSITION AND CONDUCTIVITY	:	96
Biodata	:	102
